

INTERNSHIP PRESENTATION

Junior Data Analyst – Digital Marketing & Advertising

Harsh Raj

YuvaIntern

Duration: 6 Weeks | Remote

24 August 2026 – 05 October 2026

Internship Overview

- Organization: YuvaIntern
- Role: Junior Data Analyst – Digital Marketing & Advertising
- Internship mode: Remote
- Duration: 6 weeks
- Start date: 24 August 2026
- End date: 05 October 2026

Internship Objectives

- Understand how marketing data is collected, cleaned and analyzed.
- Track digital campaign performance and audience engagement.
- Use data to identify useful patterns and insights.
- Develop recommendations for improving digital campaigns.
- Build practical skills through hands-on internship tasks.

Key Responsibilities

- Analyze marketing data for digital campaigns.
- Track and measure campaign performance.
- Study audience engagement metrics.
- Evaluate campaign results and ROI.
- Provide data-based insights and recommendations.

Work & Learning During the Internship

Activities prepared across the internship tasks

- Social media data collection and cleaning.
- Handling missing values and duplicate records.
- Preparing data for analysis using structured tables.
- Working with engagement and campaign-related metrics.
- KPI reporting and performance evaluation.
- Creating data visualizations and strategic recommendations.

Week-wise Learning Journey

Week 1

Data Collection & Cleaning

Collect, organize and clean social media campaign data.

Week 2–3

Data Analysis

Explore campaign and engagement data to identify patterns.

Week 4–5

Campaign Metrics

Track engagement, performance and other useful KPIs.

Week 6

KPI Report & Recommendations

Summarize performance and suggest improvements.

Important Digital Marketing KPIs

- Reach – number of people exposed to campaign content.
- Engagement – interactions such as likes, comments and shares.
- Click-Through Rate (CTR) – measures how often users click a campaign link.
- Conversion Rate – shows how many users complete a desired action.
- Return on Investment (ROI) – helps evaluate campaign effectiveness.

Skills Developed

- Data collection and data cleaning
- Basic data analysis and interpretation
- Working with Excel/CSV and Pandas-based workflows
- Understanding social media and digital marketing metrics
- KPI reporting and visualization
- Analytical thinking and recommendation building
- Professional communication and documentation

Key Outcomes

- Gained practical exposure to digital marketing data analysis.
- Learned how clean data supports better reporting.
- Understood the importance of KPIs in measuring campaigns.
- Improved ability to turn data into actionable recommendations.
- Developed a more structured approach to analytical tasks.

Internship Completion & Conclusion

- Successfully completed the internship with YuvaIntern as Junior Data Analyst – Digital Marketing & Advertising.
- The experience strengthened practical knowledge of data analysis, campaign metrics and reporting.
- The internship provided valuable exposure to professional work and digital marketing analytics.
- Thank You
